The hypermodern residence is finished to the last detail and furnished with high-quality design. The luxurious interior can be taken over in consultation and ensures you that you can enter without any effort. The spacious residence has a sleek, handle-free kitchen which is equipped with high-quality built-in appliances from Bosch and has an American fridge.

There is another big eye-catcher in the house: between the living room and the kitchen is an elegant, oak separation placed. On the kitchen's side is a bar top constructed, where you can sit comfortably and create more working space. The living room has all the space for a comfortable dining and sitting area. Just like the bedrooms, both the kitchen and living room have direct access

to the covered terrace and the spacious garden.

The tremendous garden can be entirely decorated by the new owners taste. The permit for a swimming pool of 8.5 by 3 meters is already present. There are also drawings available, made by the architect.

This includes two pergolas for both the lounge and dining areas. There is enough space created around the pool for several sun loungers. The architect's design can be found on the floor plan.

Another big plus is the private parking in the basement of the building, where you will have two places.
